

## STUDY OF TRANSFER CHARACTERISTICS OF CMOS INVERTER. MODEL : CI - 01.

### FEATURES :

- \*\* Circuit is engraved on a painted aluminum panel to facilitate better view under standing.
- \*\* A complete working manual containing theory, circuit details and operating procedure is supplied with the experimental board.
- \*\* Stackable type connecting leads are supplied with the board for easy and perfect inter connections.
- \*\* Continuously variable, overloading and short circuiting protected D.C. regulated power supply of 0 – 5, Volts.
- \*\* Fixed output d.c. regulated Power Supply of 5, Volts.
- \*\* Two dual range Voltmeters are mounted on the front panel to measure the input and output voltages.
- \*\* One LED is mounted on the front panel to observe the output status.
- \*\* Weight : 2.5Kg. Approximately
- \*\* Dimension : 210mm X 280mm X 82mm

### EXPERIMENTS :

Study of input and output characteristics of C – MOS Inverter.

### OTHER APPARATUS REQUIRED :

Board is self sufficient.

*NOTE: There may be any change in specification due to continuous R & D without notice.*
