

PERFORMANCE STUDY OF A CLASS A, AB AND B PUSH – PULL, MODEL : PP – 10.

FEATURES :

- ** I.C. Regulated and short circuit proof ± 15 Volt Power Supply suitable to the experimental board is built-in.
- ** Circuit is drawn on a painted aluminum panel and the components are mounted on the top of the panel for better and clear understanding.
- ** A complete working manual containing theory, circuit details and operating instruction supplied with the experimental board.
- ** Stackable type connecting leads suitable to the terminals are supplied with the board for easy inter – connections and longer working life of the terminals.
- ** Weight : 2 Kg Approximately
- ** Dimension : 210mm \times 280mm \times 82mm

EXPERIMENTS :

1. Output Power measurement (efficiency) in different class of operation of Push – Pull Amplifier.
2. Frequency response of different Class of operation of Push – Pull Amplifier.

OTHER APPARATUS REQUIRED :

1. A General purpose C.R.O.
2. Audio Frequency Oscillator, Model – 712.
3. Digital Multimeter.

Note: There may be any change in specification due to continuous R & D without notice.
