

VERIFICATION OF TELLEGEN'S THEOREM,

MODEL : TG – 10.

**FEATURES:**

- ** Fixed D.C. regulated power supply of 12 Volt.
- ** Circuit is drawn on a decorated bakelite sheet and the components are mounted on the top of the panel for better and clear understanding.
- ** A complete working manual containing operating instruction, theory and circuit details will be supplied alongwith experimental set - up.
- ** Two dual range digital panel meters (2 Volt / 20 Volts, 2 mA / 20 mA) are mounted on the front panel to measure voltage and current.
- ** Different resistances are also mounted behind the front panel and connections are brought out on the sockets.
- ** Weight : 2 Kg Approximately
- ** Dimension : 210mm × 280mm × 82mm

EXPERIMENT :

Study of Tellegen's theorem trainer has been designed to verify the Tellegen's Theorem in different circuits.

APPARATUS REQUIRED :

1. Digital Multimeter.

Note: There may be any change in specification due to continuous R & D without notice.
